NEWSLETTER Nº 4

December 2018

Dear subscriber of Baqua project:

We are very happy to keep you informed of the developments of our project and future activities.

Currently, we are developing the last generations:

- The second generation of banana sleeve, fish feed bags and reinforced plastic parts are manufactured. The third generation will be produced in the following months.
- The second fish diets were developed with the second generation of pulp and they are being tested in seabass.
- The coordinating beneficiary has already developed the third generation of fibre and pulp.

Further information of our progress in following newsletters. See you !
